

Michigan Department of Health and Human Services Interim Instructions on Prescribing Paxlovid and Molnupiravir for COVID-19 - Update 01-19-22

Paxlovid and molnupiravir are oral antiviral medications that are now available on a limited basis through select Meijer and Michigan pharmacies under an emergency use authorization issued by the FDA. E-prescribing is the preferred way of prescribing these medications as described in the MDHHS policy *Updated Priority Eligibility Criteria and Prescribing Requirements for Authorized Oral Antiviral Medications for Outpatient Treatment of Mild to Moderate COVID-19*. Until e-prescribing is available, the following process should be used to prescribe these medications using a printed and faxed prescription. Prescribers must have reviewed and be in compliance with the *Priority Eligibility Criteria and Prescribing Requirements for Authorized Oral Antiviral Medications for Outpatient Treatment of Mild to Moderate COVID-19* and with the *FDA Fact Sheets for Healthcare Providers on [Paxlovid](#) and [molnupiravir](#)*.

Instructions

1. Prescriber determines if medication is currently available in the area.
 - a. Paxlovid is limited to 25 Meijer stores. (see [Meijer COVID-19 Therapeutics Website](#))
 - b. Molnupiravir is in all Meijer pharmacies across the state. Note: this should only be prescribed when timely access to other authorized therapies (e.g., monoclonal antibodies) is delayed.
2. Determine if patient meets eligibility criteria for medication including review of patient's current medications for interactions (with Paxlovid).
3. Prescriber discusses risk and benefits with patient and provides a copy of the *FDA Fact Sheet for Patients and Care Givers* for either [Paxlovid](#) or [molnupiravir](#).
4. Prescriber determines closest pharmacy to patient that has desired medication.
5. Complete applicable prescription either via fillable PDF form or print to paper to complete.
 - a. All requested information must be provided, or prescription will not be filled.
 - b. Prescriber must sign prescription.
 - c. Include fax number of pharmacy (lower right corner of prescription) to facilitate faxing
 - d. Phone prescriptions will not be accepted.
6. Have prescription faxed to pharmacy. If faxing is unavailable, may provide copy to patient but this will delay processing.
7. Meijer will make filling this prescription a priority. During pharmacy business hours it should be ready for pick up within 30 minutes. Patient should avoid entering the store for prescription pick up.
8. Advise patient that:
 - a. Medication should be picked up and started as soon as possible and must be picked up within 5 days of symptom onset.
 - b. The medication is provided at no cost. Meijer will request insurance information, if available, for dispensing costs. There should not be out of pocket charges to patient.
 - c. Patients should use the drive-through window to pick-up prescription, as available.
 - d. If patient has barriers to transportation that would delay picking up the medication, free home delivery may be arranged by having patient contact Meijer. Delivery will be made a priority but will likely result in a delay over pharmacy pick-up. Delivery may not always be available, especially in more distant areas.

MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES
Standardized Prescription for Paxlovid™ for Treatment of COVID-19

-Standard Dosing (eGFR > 60mL/min)-

Update 01-19-22

Patient Information

PatientName:

Patient Age:

PatientDOB:

Patient Phone Number:

Core Requirements

(Must meet all below and FDA Emergency Use Authorization Criteria)

- Positive test for SARS-CoV-2 Specify Symptom Onset Date:
 Symptom onset within 5 days
 Age >12 YO and weight >40 kg
 No medication interactions identified

Priority Eligibility Criteria

(Must meet one of criteria below)

- Any age with moderate to severe immunocompromise regardless of vaccine status
Specify Condition:
 Age greater than or equal to 75 YO and **not** up to date on COVID vaccine (completion of all recommended vaccinations for age group, including booster)
 Pregnant and **not** up to date on COVID vaccines (completion of all recommended vaccinations for age group, including booster)
 Age 65 - 74, not up to date on COVID vaccines (completion of all recommended vaccinations for age group, including booster)
 Age 12 to 64 YO, not up to date on COVID vaccines, and with MI priority risk factor
Select One: N/A

Patient Order

Medication: nirmatrelvir 150 mg tablet and ritonavir 100 mg tablet

Instructions: Take 2 nirmatrelvir tablets by mouth with 1 ritonavir tablet by mouth, with all three tablets taken together twice daily for 5 days.

Dispense: #20 nirmatrelvir tablets and #10 ritonavir tablets

Refills: No Refills
